

Sportradar Integrity Services

About Us

Profile

Sportradar Integrity Services are the world's leading supplier of monitoring, intelligence, prevention and consultancy solutions to sports federations, leagues, clubs and state authorities to support them in the fight against betting-related match-fixing and sports corruption.

With over twelve years of experience, the Integrity Services have established themselves as the world's foremost experts in the area of sports integrity, betting-related fraud and match manipulation. Having started as a service provider and consultant to the sport rights holder world, today we offer a whole suite of tools and services for state authorities and law enforcement agencies as well.

With some of the world's leading sport rights holders as our partners, including FIFA, NBA, NHL, IIHF, ITF, World Rugby, ICC, UEFA, AFC and CONMEBOL, we monitor odds movements and patterns worldwide to identify suspicious activities through our unique *Fraud Detection System (FDS)*. The Reports generated by our FDS provide accurate data-driven insights into the markets of particular matches. They have been used as part of sports disciplinary procedures, criminal investigations and prosecutions.

In addition to the FDS and other **Monitoring & Detection** related services, we also offer **Intelligence & Investigation** Services to assist our partners and clients in identifying and investigating integrity threats to their sport and business. We do this by connecting those suspected of manipulating events to bettors, financiers, facilitators and other associated criminal parties. Additionally, we provide due diligence services and investigate parties that may represent an integrity or business concern.

Sportradar's Integrity Services also include state-of-the-art **Education & Prevention** solutions, which have been delivered to federations, leagues and clubs around the world. These services have successfully helped to raise awareness and understanding of illegal betting and match-fixing amongst those involved in sport.

Last but not least, we offer comprehensive **Consultancy & Regulation** services, e.g. providing guidance and strategic planning advice for matters pertaining to the regulation of sports betting.
