

# Whistleblowing App

Whistleblowers are important for a successful fight against doping. People who speak out must be confident that they will be kept safe and that there will be no negative consequences from those who commit the crimes.

## SECURE AND CONFIDENTIAL MOBILE REPORTING TOOL

Sportradar’s Integrity App provides sports organisations or sports governing bodies with a secure channel through which users can confidentially and anonymously report concerns relating to the integrity of their sport, be it about doping, match-fixing, betting or sports corruption. The app, which will be hosted on your organisation’s developer account, can be published to both Apple’s iOS App Store and Google’s Play Store for users to download.

Your app will be based on our core product, which is designed to be intuitive, user-friendly, and to meet the user experience and graphical user interface guidelines of both Apple and Google. It is not limited to the reporting of doping incidents. Users can also provide information which concern other areas of sports integrity like match fixing or corruption

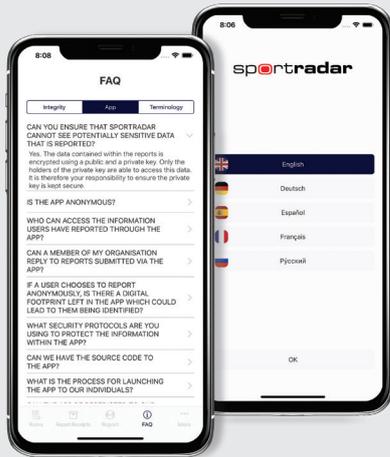

- Customisable branding
- Secure PIN code, Touch ID and Face ID access\*
- Optional reporter anonymity
- Supports multiple languages

\* On compatible devices

## RELEVANT INTEGRITY-RELATED INFORMATION COMMUNICATED DIRECTLY AND DISCREETLY

- Brand the app with your organisation's logo and colours
- Select the fields within your app's report screen to best suit your requirements
- Allow reporters to provide contact details should they wish to
- Determine which fields should be mandatory for the user to complete, ensuring you receive the most relevant information in the reports
- Define different report categories to select from, for example, "Doping" or "Match-Fixing"
- Insert your privacy notice which all users must agree to before submitting a report, to ensure GDPR compliance
- Enable reporters to record or attach evidence as audio files, photos/screenshots or documents
- Order the position of core product function buttons within the interface

## CORE PRODUCT FEATURES

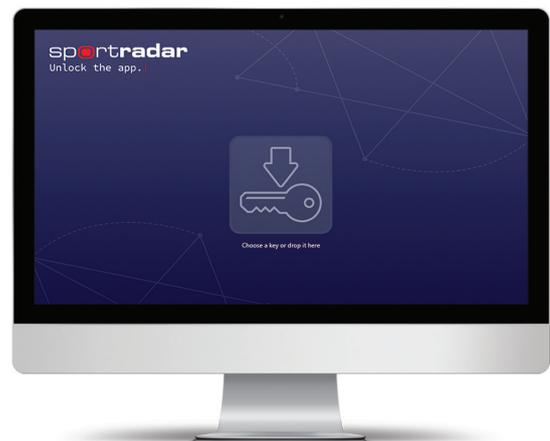

Features of the core product aside from the primary reporting function include:

- A rules and regulations area including individual rules PDF documents
- Users report receipts folder with date, time stamp and unique report reference number
- FAQs relating to integrity, the app itself, and the terminology used within it
- Your individual privacy notice and terms and conditions
- Language selection (for organisations purchasing the app in multiple languages)

## SECURE END-TO-END ENCRYPTION

Ensure optimum report security and confidentiality

- All information contained within a report, including any files attached as evidence, are securely encrypted using a public key created by your organisation
- Encrypted content transferred to a secure server
- Encrypted notification via email to your predetermined distribution list
- Use of Sportradar's cutting-edge decrypting software to unlock the encrypted link and encrypted content
- The information remains secure, providing you ensure your private key is not shared with unintended persons, and that you save the reports and their contents securely once decrypted.
- At no stage can Sportradar access any of the reports or information contained within them unless you were to instruct Sportradar to be included on the report distribution list.
